Summary. The virus that causes 2019 Coronavirus Disease (COVID-19) is easily transmitted through person-to-person contact, especially in group settings, and it is essential that the spread of the virus be slowed to protect the ability of public and private healthcare providers to handle the influx of new patients and safeguard public health and safety. Because of the risk of the rapid spread of the virus and the need to protect the most vulnerable members of the community, this Order encourages the following minimum recommended health protocols for all construction companies, sites, and workers who are considering re-opening or who have opened their businesses. These minimum health protocols are not a limit on the health protocols that individuals may adopt. Individuals are encouraged to adopt additional protocols consistent with their specific needs and circumstances to help protect the health and safety of people in Harris County.

This Order is issued to further the goals and policies of the State of Texas as set forth in the Governor's executive orders and is to be construed consistent with and in harmony with the terms of such executive orders.
