## CITIZEN SAFETY BULLETINS

- As I share each time, fraudulent email, phone or social media crimes are continuing to occur.
- However, recently we have seen an increase in social media extortion crimes where typically a teen receives a “friend” request and then participates in a video chat where over time they are encouraged to disrobe. Then the suspect reveals they have recorded the victim, and threatens that if their money demand is not met, they will post the video on social media.
- Please take a moment to discuss with your children safe parameters for the use of social media.
