

SJRA REHABILITATION OF BEAR BRANCH GRAVITY MAIN PROJECT

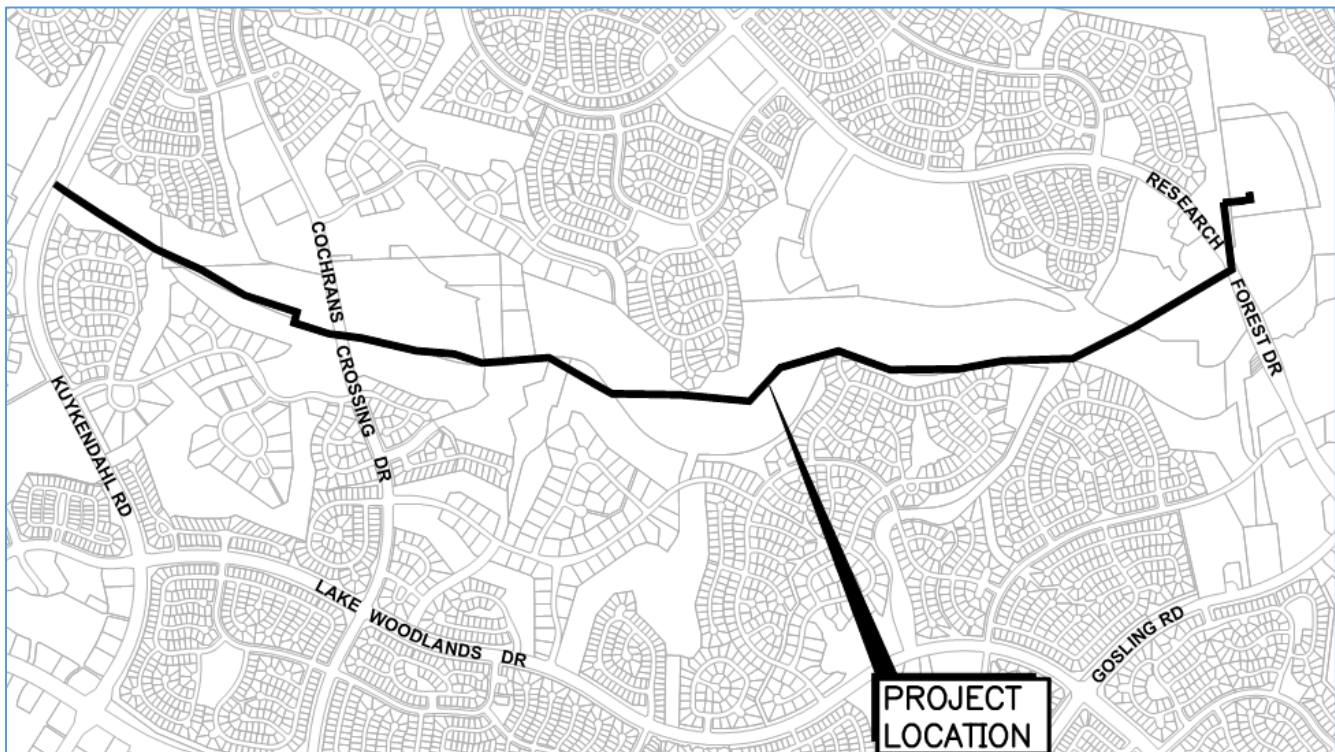

AUGUST 2019

PROJECT UPDATE AUGUST 2019

Final design of the project is complete. The funding agency, the Texas Water Development Board, has reviewed and approved the project to advertise for construction. SJRA has completed coordination with the MUDs, The Woodlands Township, The Woodlands Development Company, and Montgomery County to obtain access easements and agreements. Coordination with Conroe ISD will be conducted to ensure they are aware of the construction.

The project will advertise for construction in September 2019, with construction anticipated to start January 2020 and end May 2021. During construction, temporary access roads will be established, construction vehicles and heavy machinery will be present, but should not disrupt traffic patterns.
