

# Know Your Watershed

A partnership between SJRA, MoCo, and HCFCD, the Know Your Watershed campaign is an interactive website designed to educate San Jacinto River Basin residents by engaging them in:

1. Identifying their watershed
2. Recognizing flow patterns
3. Observing how water naturally drains throughout the basin
4. Learning important water-related facts in a creative and entertaining way

Viewers can access information by clicking on an “Address Viewer” link and searching for their location, or take a virtual tour with perky water drop SJ Watershed and her friends by clicking on the “Story Map” feature.

## Know Your Watershed

<https://www.knowyourwatershed.com/>

It is no surprise that the Greater Houston region ranks in the top ten on the National Weather Service's list of U.S. cities that have the most erratic weather conditions. Simply put, Texas weather is unpredictable. In the midst of such uncertainty and instability it is essential to Know Your Watershed. If you are able to identify that piece of information, you will be equipped with knowledge that could prepare you for the next severe weather event. The Know Your Watershed Campaign is designed to help you identify the watershed, recognize where the flow is coming from, and provide you with important water related facts. Tap into the flow of information by clicking on the Address Viewer link below and searching for your location or take a virtual tour with SJ and her friends by clicking on the Story Map.

Click here to enter an address

**ADDRESS VIEWER**

Address Viewer is an address look up tool that provides the watershed the location is in, a static map that illustrates where flow is coming from, and general information.

Click here to take a ride down the San Jacinto River

**STORY MAP**

The Know Your Watershed Story Map is a virtual tour down the San Jacinto River to Lake Houston.
