Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President’s action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see below for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

If you have any questions, please contact the National Business Emergency Operations Center at NBEOC@max.gov.

###

FEMA's mission is to help people before, during and after disasters.

Coronavirus (COVID-19) Pandemic

Whole-of-Government Response

Friday, March 27, 2020

“MY CURRENT FOCUS HAS BEEN AND WILL CONTINUE TO BE TO MAKE SURE WE GET CRITICAL SUPPLIES TO THOSE PLACES AROUND THE COUNTRY THAT NEED THEM THE MOST.” – ADMINISTRATOR PETE GAYNOR

Topline Messages

- The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.
- We are halfway through 15 Days to Slow the Spread. Do your part to flatten the curve: Stay home as much as possible. If you need to go out, practice social distancing.
- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.
- Seventeen states and 4 tribes have issued shelter-in-place orders; in addition:
 - Eight states have issued partial or localized orders.
 - One state has issued orders for certain at-risk groups only.
- On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.
 - This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary.
 - Additional states can request this assistance and those requests will be considered.
- On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President’s action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.
- In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.
- As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Medical Hotspots

New York/New York City

- FEMA and HHS are working with the Governor of New York, and New York City officials so set up a 1,000-bed medical station at the Javits Center in Manhattan to increase local healthcare capabilities.
 - The station will care for patients with non-COVID-19 healthcare needs.
 - Additional temporary hospital sites are being worked, including a 600-bed capacity nursing home facility in Brooklyn, and numerous floors of a high-rise building on Wall Street.
- FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.
- New York State prioritized 3 alternative medical facilities – in Westchester, Suffolk, Nassau Counties that are being assessed for build-out in the upcoming days by the U.S. Army Corps of Engineers.
 - In total, the alternative care facilities in New York will expand hospital capacity by approximately 6,000 beds.
- The U.S. Navy hospital ship Comfort is expected to be operational by April 4 to support New York City.
- At the request of New York state, FEMA issued a \$6 million Mission Assignment to HHS to provide round the clock medical staff to care for non-critical patients in the state.
- Supplies from the Strategic National Stockpile have arrived in New York and are being distributed to medical facilities in the most impacted areas. Supplies delivered include 2,000 ventilators for the State and 2,400 ventilators for New York City. Additional supplies included:

New York State

- 372,800 N-95 masks
- 888,100 surgical masks
- 169,100 face shields
- 137,800 surgical gowns
- 700 coveralls
- 490,900 gloves
- 2000 ventilators

New York City

- 482,200 N-95 masks
- 374,600 surgical masks
- 71,300 face shields
- 58,100 surgical gowns
- 298 Coveralls
- 207,100 gloves
- 2400 ventilators

COVID-19 WHOLE-OF-GOVERNMENT RESPONSE

California

- The U.S. Army Corps of Engineers has completed the assessment of eight state-selected facilities to develop large-scale
 - Supplemental hospital space will expand existing hospital capacity by 50,000 beds.
- The Department of Defense USNS Mercy hospital ship is being deployed to Los Angeles to relieve strains on local hospital systems and prepare to treat expected growing number of patients who experience serious COVID-19 symptoms.
 - The Mercy expects to be in place and operational within a week.
- Supplies from the Strategic National Stockpile have arrived in California and are being distributed to medical facilities throughout the state. Supplies delivered include:
 - 908,402 N-95 masks
 - 2,157,460 surgical masks
 - 444,300 face shields
 - 334,954 surgical gowns
 - 1,548 coveralls
 - 1,059,412 gloves
- FEMA completed the sale of 105 travel trailers to the state to support a State COVID-19 housing initiative for impacted individuals.
- On March 22, FEMA obligated \$32 million to the state of California to reimburse costs related to the COVID-19 response.

Washington

- Department of Defense sourced the 627th Hospital Center/10th Field Hospital to support COVID-19 response in Washington. The field hospital includes 148 bed capacity with ability to increase to 250 beds and 366 trained medical personnel
- Field hospital/alternate medical facility assessments are underway in Washington. Assessment teams will evaluate four potential sites for alternate medical facilities. Teams are comprised of members from DOD, USACE, FEMA, HHS, and state, county, and local officials.
- Total allocation of supplies from the Strategic National Stockpile (SNS) in Washington delivered through March 26 include:
 - 832,299 N-95 masks
 - 639,806 surgical masks
 - 63,788 face shields
 - 135,439 surgical gowns
 - 366,226 gloves

Louisiana/New Orleans

- Three Community Based Testing Sites are open and operational in New Orleans.
- One Centers for Disease Control Epidemiology Team arrived at the Louisiana Emergency Operations Center on March 26.

COVID-19 WHOLE-OF-GOVERNMENT RESPONSE

- Two 250-bed Federal Medical Stations to increase state hospital capacity are scheduled to arrive soon.
- U.S. Army Corps of Engineers support for assessment and evaluation of alternative care facilities are scheduled to arrive soon.
- Total allocation of supplies from the Strategic National Stockpile (SNS) delivered through March 26 include:
 - 87,222 N-95 masks
 - 207,778 surgical masks
 - 32,258 surgical gowns
 - 165 coveralls
 - 39,565 face shields
 - 114,859 gloves
- On March 23, FEMA obligated \$31 million to the state of Louisiana to reimburse expenses for the response to COVID-19.

FEMA and HHS Response

- All 50 states, the District of Columbia, five territories and five tribes are working directly with FEMA under the nationwide emergency declaration for COVID-19.
 - States, tribal and territorial governments do not need to request separate emergency declarations to receive FEMA assistance under this nationwide declaration. A tribal government may choose to be a subrecipient under a state that has chosen to be a recipient of FEMA assistance, or choose to be a direct recipient of FEMA.
 - FEMA activated all 10 Regional Response Coordination Centers to support ongoing response efforts across the country. Emergency operations centers in all states and territories are activated.
- It is important that requests for assistance, especially for critical supplies, get routed through the proper channels as soon as possible. The most efficient way to identify critical gaps and get results:
 - Consistent with the principle of locally executed, state managed, and federally supported response, requests for assistance at the local and county levels should first be routed to their respective state.
 - Any needs that cannot be met by the state or tribe should then be sent to the respective FEMA regional office. FEMA regions will direct requests to FEMA NRCC in Washington, D.C. for fulfillment.
- Federal agencies are working to meet demands for personal protective equipment (PPE) through new acquisition, DOD allocation and the Strategic National Stockpile.
- FEMA is working with HHS to deliver additional supplies and ventilators using its Logistics Supply Chain Management System to procure and track commodities to supplement state and tribal purchases.
 - On March 21, HHS awarded contracts to five companies to purchase approximately 600 million N95 respirators over the next 18 months. This purchase will encourage manufacturers to increase production of N95 respirators now, with a guarantee that

COVID-19 WHOLE-OF-GOVERNMENT RESPONSE

- companies will not be left with excess supplies if private sector orders are cancelled once the COVID-19 response subsides.
 - Additionally, a Request for Information has been issued to the private sector for ventilators.
 - FEMA issued a [request for quotation](#) on March 26, 2020, for vendors who have medical equipment and supplies to sell to the agency. The RFQ can be found on www.sam.gov.
 - FEMA is also expediting critical supplies from overseas to various locations within the U.S. Movement of supplies is expected to begin on Saturday, March 28.
- As of March 25, 22 states/localities have sent a total of 44 text messages to cell phones containing information on COVID-19 via the Wireless Emergency Alert system, and 19 messages to broadcast stations via the Emergency Alert System.
- On March 24, HHS announced \$250 million in grants from the Administration for Community Living to help states, territories and tribes provide meals to older adults. Additionally, HHS awarded \$100 million to support HHS health resources and services administration-funded health centers across the country to address screening and testing needs, acquire medical supplies and boost telehealth capacity.
- HHS also has funding available, including \$80 million dollars specifically identified for tribes, tribal organizations, and tribal health service providers.
- The Centers for Disease Control released personal protective equipment optimization strategies for healthcare providers to optimize resources, deal with limited resources and make contingency plans or alternative strategies when supplies are limited.
- National Institutes of Allergy and Infectious Diseases mobilized a rapid research response to quickly develop effective countermeasures for COVID-19, including diagnostics, vaccines and treatments.

Community-Based Testing Sites

- To date, more than 552,000 tests have been performed for COVID-19 in state and local public health and commercial laboratories throughout the U.S.
- Federal officials and the U.S. Public Health Service are working closely with state, local and private sector partners to bolster testing capabilities and supplies. We're working to make testing more easily accessible to high risk populations: healthcare facility workers, and first responders. There are currently 92 sites open in 50 states, the District of Columbia, Guam and Puerto Rico.
- Community-based Testing Sites (CBTSs) are focused on testing our nation's frontline heroes, healthcare facility workers and first responders, who are working around the clock to provide care, compassion, and safety to Americans.
- It is critical to test healthcare facility workers and first responders who are concerned that they may have been exposed to COVID-19, because they need to know their status as soon as possible in order to prevent infecting individuals in their care.
- People without symptoms who have not been exposed to COVID-19 should not be tested.
- CBTSs are another tool for states, local public health systems and healthcare systems to use as they work together to stop the spread of COVID-19 in their communities.

Ventilator Guidance

- On March 24, the FDA issued an Emergency Use Authorization (EUA) for Ventilators.
 - The EUA allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators.
- The new guidance will also assist health care personnel on how to use other ventilators like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.
- Additionally, the FDA is providing information for manufacturers on adding production lines or alternative sites, like automobile manufacturers, for making more ventilators during the COVID-19 public health emergency.

Coping with Stress

- Stress during an infectious disease outbreak, like the COVID-19 pandemic, can cause fear and worry. You may feel overwhelmed by strong emotions.
- Taking care of yourself, your friends, and your family can help you cope with stress.
- It's essential that during this time, as we make sure we are physically distancing ourselves from others, we keep up the social connection. This includes staying connected by phone, email, or chat in order to remain connected to family and friends.
- Helping others cope with their stress makes your community stronger.
- CDC has recommendations for things you can do to support yourself by managing your anxiety and stress.

Defense Production Act

- On March 18, President Trump issued an executive order outlining use of the Defense Production Act (DPA) in response to COVID-19 and supplementing Executive Order 13603, which delegates DPA authority to federal agencies.
- Because of the outpouring of support from the private sector, there has not been immediate need to use DPA.
- The order provides federal departments with the authority to take actions implementing the DPA, if and as necessary. This includes the ability to prioritize acceptance and fulfillment of contracts, allocate limited supplies, incentivize investment in additional production capacity, and enter voluntary agreements with industry partners that might otherwise be subject to antitrust laws.

Other Federal Agencies

- The National Guard is activated in 32 states, providing medical testing, assessments, logistics, planning and liaison support.
 - To date, nearly 11,400 National Guard troops have activated to help with testing and other response efforts.

COVID-19 WHOLE-OF-GOVERNMENT RESPONSE

- The US Coast Guard is tracking eight cruise ships scheduled to arrive in the U.S. with approximately 11,000 passengers and crew in total.
- The Cybersecurity and Infrastructure Security Agency (CISA) has published guidance on essential critical infrastructure workers during COVID-19 response.
- The U.S. Army Corps of Engineers completed 14 reconnaissance missions. More than 540 USACE personnel are supporting the COVID-19 mission.
- The Small Business Administration is providing low-interest loans to small businesses and nonprofits severely impacted by the Coronavirus (COVID-19). The SBA also announced deferments on all SBA disaster loans from previous disasters, effective through Dec. 31.
- The U.S. Department of Labor announced the availability of up to \$100 million for Dislocated Worker Grants to help address the workforce-related impacts related to COVID-19.
- The U.S. Department of Housing and Urban Development issued a moratorium on foreclosures and evictions for single family homeowners with FHA-insured mortgages for the next 60 days.
- The U.S. Department of Agriculture is delivering one million meals per week to children in rural areas who are out of school.
- The U.S. Department of Education announced all borrowers with federally held student loans will have zero interest rates for at least 60 days. Additionally, these borrowers will have the option to suspend their payments for at least two months to allow them greater flexibility.
- The Food and Drug Administration approved a Phase-3 clinical trial using a rheumatoid arthritis drug for treatment of severe COVID-19 pneumonia.
- The Department of Homeland Security has extended the REAL ID enforcement deadline to Oct.1, 2021

Combating Disinformation and Rumors

- To help the American public distinguish between rumors and facts regarding the response to COVID-19, FEMA has created a Rumor Control page on FEMA.gov. The public can help control the spread of rumors by sharing our page: [fema.gov/coronavirus](https://www.fema.gov/coronavirus).
- Check the sources of information you see about COVID-19 by seeking out trusted, verified sources like www.coronavirus.gov or your state and local government's official accounts.
- Everyone can do their part to stop the spread of disinformation by doing three things; don't believe rumors, don't pass them along, and go to trusted sources of information to get the facts.

How to Help

- Following state, tribal and local officials' instructions to stay at home is an important way to help. Social distancing not only protects you, but it protects the people you care about.
 - Data show that older adults and people of any age who have serious underlying medical conditions are at higher risk for severe illness from COVID-19.
 - Staying home and limiting your interactions with people can break the chain of transmission and halt the spread of this new virus.
- Cash donations to the nonprofit of your choice IS THE BEST donation. Do not collect or distribute donations of supplies without understanding community needs.

COVID-19 WHOLE-OF-GOVERNMENT RESPONSE

- Businesses that have medical supplies or equipment to donate are asked to go to www.fema.gov and provide of the offer through our online medical supplies and equipment form.
- To sell medical supplies or equipment to the federal government, please submit a price quote under the [COVID-19 PPE and Medical Supplies Request for Quotation](#). Full details can be found in the solicitation ([Notice ID 70FA2020R00000011](#)).
- Licensed medical volunteers can offer their services by registering with [the Emergency System for Advance Registration of Volunteer Health Professionals](#). You can access a direct link to do so through fema.gov.
- One thing people can do to help is to donate blood. Many blood drives have been cancelled, impacting the supply. Blood donation centers have the highest standards of safety and infection control. To find where you can donate blood, visit redcross.org.

Strategic National Stockpile

- The Strategic National Stockpile (SNS) continues to ship medical equipment nationwide.
- As of March 25, the SNS has delivered or is currently shipping the following personal protective equipment and supplies to support public health authorities in the states, four largest metro areas (New York City, Los Angeles County, Chicago, Washington, D.C.) and U.S. territories:
 - 9 million N95 respirators
 - 20 million surgical/face masks
 - 3.1 million face shields
 - 5,960 ventilators
 - 2.6 million gowns
 - 14.6 million gloves
